*Rand article from wiki

Films are cultural artifacts created by specific cultures. They reflect those cultures, and, in turn, affect them. Film is considered to be an important art form, a source of popular entertainment, and a powerful medium for educating—or indoctrinating—citizens. The visual basis of film gives it a universal power of communication. Some films have become popular worldwide attractions through the use of dubbing or subtitles to translate the dialog into other languages. The individual images that make up a film are called frames. In the projection of traditional celluloid films, a rotating shutter causes intervals of darkness as each frame, in turn, is moved into position to be projected, but the viewer does not notice the interruptions because of an effect known as persistence of vision, whereby the eye retains a visual image for a fraction of a second after its source disappears. The perception of motion is partly due to a psychological effect called the phi phenomenon.

Animation : Animation is a technique in which each frame of a film is produced individually, whether generated as a computer graphic, or by photographing a drawn image, or by repeatedly making small changes to a model unit see claymation and stop motion, and then photographing the result with a special animation camera. When the frames are strung together and the resulting film is viewed at a speed of 16 or more frames per second, there is an illusion of continuous movement due to the phi phenomenon. Generating such a film is very labor-intensive and tedious, though the development of computer animation has greatly sped up the process. Because animation is very time-consuming and often very expensive to produce, the majority of animation for TV and films comes from professional animation studios. However, the field of independent animation has existed at least since the 1950s, with animation being produced by independent studios and sometimes by a single person. Several independent animation producers have gone on to enter the professional animation industry. Limited animation is a way of increasing production and decreasing costs of animation by using short cuts in the animation process. This method was pioneered by UPA

and popularized by Hanna-Barbera in the United States, and by Osamu Tezuka in Japan, and adapted by other studios as cartoons moved from movie theaters to television.¹⁶ Although most animation studios are now using digital technologies in their productions, there is a specific style of animation that depends on film. Camera-less animation, made famous by film-makers like Norman McLaren, Len Lye, and Stan Brakhage, is painted and drawn directly onto pieces of film, and then run through a projecto

Streaming services The BBC noted that the popularity of streaming services could increase, especially if more people are isolated at home,⁸⁵ with The Guardian suggesting that non-blockbuster films may be sent to streaming more quickly than anticipated after release, to catch this market.⁷ One popular film to stream was 2011's *Contagion*, which moved up from being the 270th most-Watched Warner Bros. film in December 2019 to become its 2nd most-Watched film in 2020 by March⁷²¹⁸ and entered the top 10 on iTunes film rentals,²¹⁹ ostensibly due to the similarities its story bears to the outbreak.⁷²¹⁸²¹⁹ The stock of increased in 2020 by March 12. The platform had released its original docuseries *Pandemic: How to Prevent an Outbreak* at the end of January 2020.⁸¹ Disney+ went live in India on March 11 via its domestic service Hotstar, eighteen days before it was set to, though Disney's shares had fallen by 23% on March 9.⁸¹
